4Q/03: The data was revised to reflect the testing of 29 sirens in early October that were not tested in September. The indicator data reflects the change report for 3Q-2003.

3Q/03: The data was revised to reflect that 29 of the 112 sirens were tested in the first week of October 2003 (4Q-2003). The tests of these 29 sirens would normally have been performed in September 2003 but were not scheduled for performance until the first thee days of October due to an administrative error. The sirens were not out-of-service for maintenance or repair and are believed to have been capable of operation if activated in this timeframe. The data was modified to reflect that these delayed tests were non-opportunities in September 2003 and are reflected in the October 2003 data (4Q-2003).

4Q/03: Analysis results for December were not available when this report was prepared because the results of laboratory analysis of samples for December will not be available until January. Weekly calculations completed through December 31, 2003 indicate cumulative doses for 4Q-2003 were well below the specified values. The sample analysis results for 4Q-2003 will be reflected in the April 2004 data submittal (for 1Q-2004). The sample analysis results for 3Q-2003 were as reported in the October 2003 data submittal (for 3Q-2003).
